Strong and Colourful

With a sturdy, metal top plate, the Trust GXT 853 Esca Metal Rainbow Gaming Keyboard can withstand anything you're faced with on the online battlefield. This colourful gaming keyboard uses adjustable LED lighting to give it that true gamer aesthetic, while the integrated phone holder will help you keep an eye on incoming messages while you play.

Full-size Layout

The Esca uses a full-size layout, which means you got full control over anything, even if it's not game related. There are 12 media and office function keys and it has a complete numpad, which makes the Trust Esca suitable for anything, from writing documents to owning battle royals.

Eyes on the Prize

Stay focused, especially when you're in the middle of a hectic battle. The Esca has a special gaming mode, which disables the Windows key to make sure you're not accidentally kicked to the desktop. On top of that, incoming messages on your phone can really be distracting. By placing your phone in the integrated holder, you'll easily see if you've got an important message, without having to take your eyes off the screen for longer than a second.

Your Identity

The Trust Esca is equipped with rainbow illuminated LEDs to give it that true gamer aesthetic. Adjust the speed of the colours and set the brightness to the level you like the most. Plug this gaming keyboard in your PC, adjust it to your liking and go online. The noobs are waiting for you.
