

Praised Design

Back in its best shape ever

Crafted out of a unique combination of felt and vegetable-tanned leather, this sleeve has been designed to securely carry the all new 13" Macbook Pro, along with its 3rd generation predecessor as well as the 13" Macbook Air and iPad Pro including Smart Keyboard. Praised by leading style blogs including Highsnobiety, Hypebeast, and Design Milk.

Back in its best shape ever

One of our most popular designs, back in its best shape ever. We've reworked every element of the praised Macbook sleeve design and made it even better. We started with the core, the materials, and developed every component with the highest possible attention to detail.

Praised Design

The leather flap, with one snap button on the right, provides a simple closure and keeps your device secure. The rivets are lined to keep your Macbook from touching anything but soft, thick felt. When you take the sleeve in hand, you'll instantly notice the quality of the materials.

Remarkably Functional

The unique combination of felt and vegetable-tanned leather offers padding comfort for your Macbook. The integrated storage compartments allow you to store documents, earplugs, and other essentials. As an additional feature, we've integrated slots inside the sleeve to store debit/credit cards as well as a SD card.

Fits the new Macbook Pro

Crafted out of a unique combination of felt and vegetable-tanned leather, this quintessential sleeve has been designed to securely carry the all new 13" Macbook Pro, along with its 3rd generation predecessor as well as the 13" Macbook Air and iPad Pro including Smart Keyboard.

Full-grain Leather

The full-grain, vegetable-tanned leather used is manufactured with care, waxed to extend durability, and carefully treated with aniline oil to enrich 'color tones'. Vegetable-tanned leather wears in with use and acquires beautiful patina and polish over time, as it becomes part of your daily life.

Due to the nature of full vegetable tanned leathers, it features a very dense and compact structure. The quality of the leather enables us to leave it cosmetically untouched while emphasizing the character of the material and staying true to the concept of the collection; nude leather and raw edges emphasize the understated and sleek appearance.

Signature Felt

Felt is a sustainable and renewable material, offering durability while remaining soft to the touch. Felt can be easily cleaned, and a special treatment gives it excellent anti-peeling properties and makes the sleeve water repellent.
