User Guide

Read the safety notices and important tips in the included manuals before using your computer.

Lenovo™

Notes

- Before using the product, be sure to read *Lenovo Safety and General Information Guide* first.
- The latest electronic compliance and environmental information are available from the Lenovo compliance information Web sites.
  - To view compliance information go to:
    http://www.lenovo.com/compliance.
  - To download environmental information go to:
    http://www.lenovo.com/ecodeclaration.
- Some instructions in this guide may assume that you are using Windows® 7 or Windows® 10. If you are using another Windows operating system, some operations may be slightly different. If you are using other operating systems, some operations may not apply to you.
- The features described in this guide are common to most models. Some features may not be available on your computer or your computer may include features that are not described in this user guide.
- The illustrations used in this manual are for Lenovo V110-14AST unless otherwise stated.
- The illustrations in this manual may differ from the actual product. Please refer to the actual product.

Regulatory Notice

- For details, refer to **Guides & Manuals** at http://support.lenovo.com.

Chapter 1. Getting to know your computer

■■ Top view ─────────────────────────────────

■ **V110-14IAP/V110-14AST**

■ **V110-15ISK/V110-15IAP/V110-15AST**
Note: The dashed areas indicate parts that are not visible externally.

◎ **Attention:**
   • Do *not* open the display panel beyond 180 degrees. When closing the display panel, be careful *not* to leave pens or any other objects in between the display panel and the keyboard. Otherwise, the display panel may be damaged.

1	**Integrated camera**	Use the camera for video communication.
2	**Built-in microphone**	Capture sound which can be used for video conferencing, voice narration, or audio recording.
3	**Wireless LAN antennas**	Connect to a wireless LAN adapter to send and receive wireless radio signals.
4	**Computer display**	The LCD display with LED backlight provides brilliant visual output.
5	**Power button**	Press this button to turn on the computer.
6	**Touch pad**	The touch pad functions as a conventional mouse.

Touch pad: To move the pointer on the screen, slide your fingertip over the pad in the direction in which you want the pointer to move.
Touch pad buttons: The functions of the left/right side correspond to those of the left/right mouse button on a conventional mouse.

Note: You can enable/disable the touch pad by pressing **F6** (⌨).

7 **Numeric keypad** For details, see "Using the keyboard" on page 4.

■ **Using the keyboard**

Your computer has number keys and function keys and may also have a numeric keypad (V110-15ISK/V110-15IAP/V110-15AST only) incorporated into its standard keyboard.

Numeric keypad
V110-15ISK/V110-15IAP/V110-15AST

The keyboard has a separate numeric keypad. To enable or disable the numeric keypad, press the **Num Lock** key.
■ **Using the keyboard**

Hotkeys

You can access certain system settings quickly by pressing the appropriate hotkeys.

V110-14IAP/V110-14AST

V110-15ISK/V110-15IAP/V110-15AST

|			
◁ F1	Mutes/unmutes the sound.	✈ F7	Enables/disables airplane mode.
◁– F2	Decreases the volume level.	🖾 F8	Enables/disables camera.
◁+ F3	Increases the volume level.	🔒 F9	Locks/unlocks the LCD screen.
✕ F4	Enables/disables microphone.	▢▢ F10	Enables the external projector or dangles the external display.
C F5	Refreshes page.	☼– F11	Decreases the display brightness until the LCD backlight is turned off.
🖾 F6	Enables/disables the touch pad.	☼+ F12	Increases display brightness.
▶/❚❚	Play/pause the current video (audio).	■	Stop the current video (audio).
◄◄	Fast backward when playing.	►►	Fast forward when playing.

Note: If you changed the **Hotkey Mode** from **Enabled** to **Disabled** in the BIOS setup utility, you will need to press the Fn key in combination with the appropriate hotkey.

■■ Left-side view ————————————————————————
1 **AC power adapter jack**   Connects to the AC power adapter.

2 **Ventilation slots**   Dissipate internal heat.

> **Note:** Make sure that none of the ventilation slots are blocked, or else overheating of the computer may occur.

3 **RJ-45 port**   Connects the computer to an Ethernet network.

4 **HDMI port**   Connects to devices with HDMI input such as a TV or a display.

5 **USB port**   Connects to USB devices.

> **Notes:**
> • The blue port supports USB 3.0.
> • For details, see "Connecting USB devices" on page 8.

■ **Connecting USB devices**

You can connect a USB device to your computer by inserting its USB plug (Type A) into the USB port on your computer.

The first time you plug a USB device into a particular USB port on your computer, Windows automatically installs a driver for that device. After the driver has been installed, you can disconnect and reconnect the device without performing any additional steps.

Note: Typically, Windows detects a new device after it has been connected, and then installs the driver automatically. However, some devices may require you to install the driver before connecting. Check the documentation provided by the device's manufacturer before connecting the device.

Before disconnecting a USB storage device, make sure your computer has finished transferring data to that device. Click the **Safely Remove Hardware and Eject Media** icon in the Windows notification area to remove the device before disconnecting.

Note: If your USB device uses a power cord, connect the device to a power source before connecting it. Otherwise, the device may not be recognized.

▪▪ Right-side view ───────────────────────

■ **V110-14IAP/V110-14AST**
■ **V110-15ISK/V110-15IAP/V110-15AST**
a	**Novo button**	When the computer is off, press this button to start the System Recovery or the BIOS setup utility, or to enter the boot menu.
b	**Combo audio jack**	Connects to headsets.

Notes:
- The combo audio jack does not support conventional microphones.
- The recording function may not be supported if third-party headphones or headsets are connected, due to different industry standards.

3 **Kensington Mini Security slot**

For attaching a Kensington MiniSaver^{TM} Mobile (or compatible) lock.
Attach a security lock (not supplied) here to help protect your computer from theft and unauthorized use. You can attach a security lock to your computer to help prevent it from being removed without your permission. For details on installing the security lock, please refer to the instructions shipped with the security lock that you have purchased.

Notes:
- Lock is not supplied. When purchasing a lock, choose one that utilizes the Cleat^{TM} locking mechanism and verify its compatibility with the slot before purchase. A lock utilizing the T-Bar^{TM} locking mechanism is not compatible with the Kensington Mini Security slot.
- Before purchasing any security product, verify that it is compatible with this type of security keyhole.
- You are responsible for evaluating, selecting, and implementing the locking devices and security features. Lenovo offers no comment, judgment, or warranty regarding the function, quality, or performance of locking devices and security features.

4 **Optical disc drive**   Reads/Burns optical discs.

Note: Some models are supplied with a dummy optical disc drive.

▄▄ Front view ───
a **Memory card slot** Insert memory cards (not supplied) here.

Note: For details, see "Using memory cards (not supplied)" on page 14.
2 **System status indicators**

Battery/Charging status indicator ▭⊞
Hard disk drive indicator ⊟

Indicator	AC power adapter status	System status	Indicator status	Meaning
Battery/ Charging status indicator	Disconnected	working	Solid light amber	The battery has between 1% and 5% charge.
			Solid amber	The battery has between 5% and 20% charge.
			Solid green	The battery has more than 20% charge.
		Sleep	Blinking amber	The battery has between 1% and 20% charge.
			Blinking green	The battery has more than 20% charge.
	Connected	working	Solid light amber	The battery has between 1% and 5% charge.
			Fast blinking amber	The battery has between 5% and 20% charge. When battery charge reaches 20%, the blinking color changes to green.
			Slow blinking green	The battery has between 20% and 80% charge and is still charging. When the battery reaches 80% charge the light will stop blinking.
			Solid green	The battery has more than 80% charge, charging will continue until the battery is fully charged.
		Sleep	Blinking amber	The battery has between 1% and 20% charge.
			Blinking green	The battery has more than 20% charge.

Indicator	AC power adapter status	System status	Indicator status	Meaning
Hard disk drive indicator	--	--	On	The hard disk drive is reading or writing data. **Attention:** • When the indicator is on, do not put the computer into sleep mode or turn off the computer. • When the indicator is on, do not move the computer. Sudden physical shock might cause hard disk drive errors.

■   **Using memory cards (not supplied)**

Your computer supports the following types of memory cards:
• Secure Digital (SD) card
• Secure Digital High Capacity (SDHC) card
• SD eXtended Capacity (SDXC) card
• MultiMediaCard (MMC)

Notes:
• Insert *only* one card in the slot at a time.
• This card reader does not support SDIO devices (e.g., SDIO Bluetooth, etc.).

Inserting a memory card

Insert the memory card until it touches the bottom of the slot.

Removing a memory card

Gently pull the memory card out of the memory card slot.

Note: Before removing the memory card, disable it by using the Windows safely remove hardware and eject media utility to avoid data corruption.

▣▪ Bottom view ───────────────────────────────
1 **Speakers** Provide audio output.

Note: Some models are supplied with 1 single speaker.

2 **Ventilation slots** Dissipate internal heat.

Note: Make sure that none of the ventilation slots are blocked, or else overheating of the computer may occur.

Chapter 2. Starting to use Windows

■■ Configuring the operating system for the first time ──────────

You may need to configure the operating system when it is first used. The configuration process may include the procedures below:
• Accepting the end user license agreement
• Configuring the Internet connection
• Registering the operating system
• Creating a user account

■■ Operating system interfaces ──────────

The return of the Start menu

Windows 10 comes with a powerful and useful start menu. To open the start menu, do one of the following:
• Select the Start button in the lower-left corner, the Start menu is displayed.
• Press the Windows key on the keyboard.

The power button is on the Start menu, click it you can choose to shut down or restart the computer, or put the computer into sleep mode.
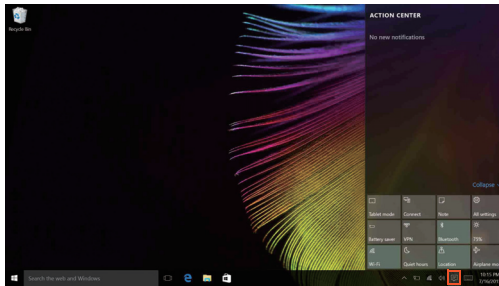

Through the Start menu, you can locate all the installed apps or view the frequently used apps.

The ACTION CENTER

Select the ACTION CENTER icon 📑 on the taskbar and the ACTION CENTER is displayed.

From the ACTION CENTER, you can examine important notifications from Windows and your apps. Moreover, you can change common settings quickly.

Task View in taskbar

In Windows 10, you can add a new desktop and switch between different desktops.
To add a new desktop, do the following:

• Click the Task View icon ⬚ in the taskbar area.

• Click **New desktop**.

To switch between desktops, click the Task View icon , then select your desired desktop.

Putting the computer to sleep or shutting it down

When you have finished working with your computer, you can put it to sleep or shut it down.

■ Putting your computer to sleep

If you will be away from your computer for only a short time, put the computer to sleep.
When the computer is in sleep mode, you can quickly wake it to resume use, bypassing the startup process.
To put the computer to sleep, do one of the following:
• Close the display lid.
• Press the power button.
• Preform the following based on the operating system.

For the Windows 7 operating system:

Click **Start** → **Sleep**

For the Windows 10 operating system:
Move the cursor to the lower-left corner, and then select the Start button.

Select **Power** → **Sleep**.

> **Note:** Put your computer to sleep before you move it. Moving your computer while the hard disk drive is spinning can damage the hard disk, causing loss of data.

To wake the computer, do one of the following:
• Press any key on the keyboard.
• Press the power button.

■ **Shutting down the computer**

If you are not going to use your computer for a long time, shut it down.
To shut down your computer, do one of the following:
• **For the Windows 7 operating system:**

Click **Start** → **Shut down**
• **For the Windows 10 operating system:**
Move the cursor to the lower-left corner, and then select the Start button.

Select **Power** → **Shut down**.

• Right-click the Start button in the lower-left corner and select **Shut down or sign out** → **Shut down**.

◼◻ Connecting to a wireless network ────────

Enabling wireless connection

To enable wireless functions, do one of the following:

- Click the ACTION CENTER icon 📮 in the notification area, and then deselect **Airplane mode**.
- Press ⌨ to disable airplane mode.
- **For the Windows 7 operating system:**
  Click the wireless network connection status icon in the Windows notification area. A list of available wireless networks will be displayed.
- **For the Windows 10 operating system:**
  Click **Settings** ⚙ → **Network & Internet** → **Airplane mode** to open the network configuration page. Then toggle the airplane mode switch to **Off**.

Connecting to a wireless network

After wireless has been enabled, the computer will automatically scan for available wireless networks and display them in the wireless network list. To connect to a wireless network, click the network name in the list, and then click **Connect**.

> **Note:** Some networks require a network security key or passphrase for connection. To connect to one of those networks, ask the network administrator or the Internet service provider (ISP) for the security key or passphrase.
▪▪ Get help from Windows ───────────────

If you have a problem with the operating system, see the Windows Get Started app. To open it, do the following:

• Move the cursor to the lower-left corner, and then select the Start button. Select **Get Started** from **All apps**.

Chapter 3. Recovery system

Push-button reset

Push-button reset is a built-in recovery tool that enables users to restore their operating system to its original state. This preserves their data and important customizations, without the need to back up their data in advance. The following **Push-button reset** features are available to users from multiple locations within Windows:

Refreshing the computer

Fixes software problems by reinstalling the factory default configuration. This preserves the user's data, important settings, and any Windows Store apps previously purchased from the Windows Store.

Resetting the computer

Prepares the computer for recycling or transfer of ownership. This reinstalls the factory default configuration and returns all user data and applications to the state of their original Out-of-Box Experience (OOBE).

■ **Using Push-button reset**

Push-button reset can be launched using one of the following methods:
- Novo button:
  - Shut down the computer and wait at least five seconds. Press the Novo button and then select **System Recovery**.
- Settings:
  - **Settings** → **Update & security** → **Recovery** → **Advanced startup** → select **Restart now**.

For more instructions, see the Windows Help and Support file on your computer.

When I purchased my computer, it included a copy of Windows. How can I determine whether the copy of Windows is preinstalled by Lenovo?

On the outside of the sales package of your computer, you should find a label containing configuration information for your computer. Check the printed string next to **OS**. If it contains **Windows** or **WIN**, the copy of Windows was preinstalled by Lenovo.

I uninstalled a preinstalled software, but there is no significant increase in the free drive space.

> The copy of Windows running on your computer may be Compact technology enabled. For computers with Compact technology enabled Windows, the majority of files needed for preinstalled software are installed on the Recovery Partition and won't be deleted through normal uninstallation.

How can I determine whether the Windows running on my computer is Compact technology enabled?

> Compact technology is normally enabled on copies of Windows 10 Update running on SSD (or eMMC) -only computer models. To check your computer,
>
> ❶ Right-click the Start button in the lower-left corner and select **Disk Management**.
>
> ❷ The Disk Management program starts.
>
> If **Wim Boot** is labeled on the Windows partition (as illustrated), Compact technology is enabled on your copy of Windows.

Where can I find drivers for the various hardware devices of my computer?

> If your computer is preinstalled with a Windows operating system, first check the installation program on the D partition of your hard disk (for select models, on the C partition). If you cannot find the drivers for all the hardware devices that you need there, download the drivers from the Lenovo consumer support website.

> **Note:** The Lenovo support Web site contains the latest drivers.

Chapter 4. Troubleshooting

◼◻ Frequently asked questions ───────────────

This section lists frequently asked questions by category.

◼ Finding information

What safety precautions should I follow when using my computer?

> The *Lenovo Safety and General Information Guide* which came with your computer contains safety precautions for using your computer. Read and follow all the precautions when using your computer.

Where can I find the hardware specifications for my computer?

> You can find hardware specification for your computer on the printed flyers which came with your computer.

Where can I find warranty information?

> For the warranty applicable to your computer, including the warranty period and type of warranty service, see the Lenovo limited warranty flyer that came with your computer.

◼ Drivers and preinstalled software

Where are the installation discs for Lenovo preinstalled software (desktop software)?

> Your computer does not come with installation discs for Lenovo preinstalled software. If you need to reinstall any preinstalled software, you can find the installation program on the D partition of your hard disk (for select models, on the C partition). If you cannot find the installation program there, you can also download it from the Lenovo consumer support website.

Where can I find drivers for the various hardware devices of my computer?

> If your computer is preinstalled with a Windows operating system, Lenovo provides drivers for all the hardware devices that you need on the D partition of your hard disk (for select models, on the C partition). You can also download the latest device drivers from the Lenovo consumer support website.

■ **BIOS setup utility**

What is the BIOS setup utility?
> The BIOS setup utility is ROM-based software. It displays basic computer information and provides options for setting boot devices, security, hardware mode, and other preferences.

How can I start the BIOS setup utility?
> To start the BIOS setup utility:
> ❶ Shut down the computer.
> ❷ Press the Novo button and then select **BIOS Setup**.

How can I change the boot mode?
> There are two boot modes: **UEFI** and **Legacy Support**. To change the boot mode, start the BIOS setup utility and set boot mode to **UEFI** or **Legacy Support** on the boot menu.

When do I need to change the boot mode?
> The default boot mode for your computer is **UEFI** mode. If you need to install a legacy operating system, such as Windows, Linux or Dos, etc (that is, any operating system before Windows 8) on your computer, you must change the boot mode to **Legacy Support**. The legacy operating system, such as Windows, Linux or Dos, etc cannot be installed if you don't change the boot mode.

■ **Getting help**

How can I contact the customer support center?
> See "Chapter 3. Getting help and service" of *Lenovo Safety and General Information Guide*.

▪▫ Troubleshooting ─────────────────────────────────

Display problems

When I turn on the computer, nothing appears on the screen.	• If the screen is blank, make sure that: - The AC power adapter is connected to the computer, and the power cord is plugged into a working electrical outlet. - The computer power is on. Press the Power button again for confirmation. • If these items are set correctly, and the screen remains blank, have the computer serviced.
When I turn on the computer, only a white cursor appears on a blank screen.	• Restore backed-up files to your Windows environment or the entire contents of your hard disk to its original factory contents using Push-button reset. If you still see only the cursor on the screen, have the computer serviced.
The screen goes blank while the computer is on.	• Your power management is enabled. Do one of the following to resume from sleep mode: - Press any key on the keyboard. - Press the Power button. - Press **F9** (⌨) to confirm whether the backlight of the LCD screen has been turned off.

Sleep problems

The critical low-battery error message appears, and the computer immediately turns off.	• The battery power is getting low. Connect the AC power adapter to the computer.
The computer enters sleep mode immediately after Power-on.	• Make sure that: - The battery is charged. - The operating temperature is within the acceptable range. See "Chapter 2. Use and care Information" in the *Lenovo Safety and General Information Guide*.

Note: If the battery is charged and the temperature is within range, have the computer serviced.

The computer does not return from sleep mode and the computer does not work.	• If your computer is in sleep mode, connect the AC power adapter to the computer, then press the Windows button or the Power button. • If the system still does not return from sleep mode, your system has stopped responding, and you cannot turn off the computer; reset the computer. Unsaved data may be lost. To reset the computer, press and hold the Power button for eight seconds or more. If the computer still does not reset, remove the AC power adapter.

Display panel problems

The screen is blank.	• Do the following:
	  - If you are using the AC power adapter or the battery, and the battery status indicator is on, press **F12** ($\boxed{*}$) to make the screen brighter.
	  - If the power indicator is blinking, press the Power button to resume from sleep mode.
	  - Press **F9** ($\boxed{\square}$) to confirm whether the backlight of the LCD screen has been turned off.
	  - If the problem persists, follow the solution in the next problem "The screen is unreadable or distorted."

The screen is unreadable or distorted.	• Make sure that:
	  - The screen resolution and color quality are correctly set.
	  - The monitor type is correct.

Incorrect characters appear on the screen.	• Is the operating system or programs installed correctly? If they are installed and configured correctly, have the computer serviced.

Sound problems

No sound can be heard from the speakers even when the volume is turned up.	• Make sure that:
	  - The Mute function is off.
	  - The combo audio jack is not being used.
	  - Speakers are selected as the playback device.

Battery problems

Your computer shuts down before the battery status indicator shows empty. *-or-* Your computer operates after the battery status indicator shows empty.	• Recharge the battery.

Other problems

Your computer does not respond.	• To turn off your computer, press and hold the Power button for eight seconds or more. If the computer still does not respond, remove the AC power adapter. • Your computer might lock when it enters sleep mode during a communication operation. Disable the sleep timer when you are working on the network.
The connected external device does not work.	• Do *not* connect or disconnect any external device cables other than USB while the computer power is on. Otherwise, you might damage your computer. • When using high power consumption external devices, such as an external USB optical drive, use an external device power adapter. Otherwise, the device may not be recognized, or the system may shut down as a result.

Appendix A. CRU instructions

Customer Replaceable Units (CRUs) are parts that can be upgraded or replaced by the customer. If a CRU is determined to be defective during the warranty period, a replacement CRU will be provided to the customer. Customers are responsible for installing the self-service CRUs for this product. Customers also can install optional-service CRUs, which might require some technical skills or tools, or request that a technician install the optional-service CRU under the terms of the applicable warranty service type for your country or region.

Notes:
- The illustrations used in this chapter are of the Lenovo V110-14AST, unless otherwise stated.
- The illustrations in this manual might differ from the actual product. Please refer to the actual product.
- The CRU service is only applicable to certain countries.

▪▪ Replacing the optical drive ──────────────

To replace the optical drive, do the following:

❶ Turn off the computer. Disconnect the AC power adapter and all cables from the computer.

❷ Close the computer display and turn the computer over.

❸ Remove the screw **1**.
4 Gently pull the optical drive out from its cavity 2 .

5 Insert a new optical drive and tighten the screw to secure the drive.

6 Turn the computer over again.

7 Connect the AC power adapter and the cables to the computer.

Appendix A. CRU instructions

The following table provides a list of CRUs for your computer, and informs you of where to find replacement instructions.

Self-service CRUs

	Safety, Warranty, and Setup Guide	User Guide
AC power adapter	×	
Power cord	×	
Optical drive		×
