- Select easily the coffee settings with the brewing knob

Easy to experience
- Adjustable keep-warm time from 10 minutes to 2 hours
- Water level indication for easy filling
- Drip stop to pour a cup of coffee whenever you like

Highlights

Integrated bean grinder

To have the delicious taste of freshly ground coffee, fresh coffee beans are grinded before brewing. This coffee maker has conical burr grinders to have the optimal grind size, which ensures the best taste.
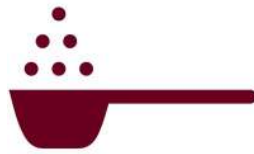

Aroma twister

This smart nozzle inside the jug circulates the inflowing coffee evenly through the jug for an optimal and consistent aroma, from the first to the last cup.

Strength select

Adjust the intensity of your coffee from mild, medium or intense coffee.

Ground coffee brew

You can also use ground coffee instead of coffee beans. The grind-off function disables the grinder and you can simply fill ground coffee into the filter.

Grind selector knob

Personalize the coffee taste, by choosing between 9 grind size options. Select a fine grind for a stronger coffee taste or coarse grind for a lighter, smooth filter coffee.

Easy selection of settings

Thanks to the convenient brewing knob, you can easily select and customize your preferred coffee setting, for instance the number of cups and coffee strength.

Adjustable keep-warm time

Select how long you want your coffee to stay hot after brewing. You can adjust the automatic shut-off time from 10 minutes up to 2 hours.

Drip stop

The drip stop allows you to pour a cup of coffee before the full brewing cycle is finished.

Water level indication

Fill the water tank easily and precisely with the water level indication.

Aroma seal

Aroma seal to keep your beans fresh in the container

Specifications

Accessories
Included: Glass jug

Sustainability
Power consumption brewing: 1000 W
